Leading the Region, with Cutting-Edge Bearing Innovation

In a world that is fast on the move, industries need a bearing partner that can deliver speed, efficiency as well as reliability.

Hi-Tech Bearings is in step with this fast-paced world. Founded in 1991, we have emerged as a leading bearing solutions provider for industries across Karnataka and as a key partner of Schaeffler in India.

Through our deep association with Schaeffler and our vast experience across industries, we at Hi-tech have evolved from product distributors to solution providers. Our speed, large inventory and advanced service solutions enabled us to become the most reputed bearing supplier in a very short span. By enabling businesses to lead with increased productivity, we have proven ourselves to be a partner that can make a real difference.

As a global technology leader, Schaeffler is actively engaged in innovating and shaping the global pace of change. It is the technology leader for industrial bearing solutions, through its high-precision components and systems coupled with rolling & plain bearing solutions and asset management services.

Hi-Tech Bearings

Karnataka's Leading Bearing Distributor

Hi-tech is Karnataka's leading industrial bearing distributor and authorised industrial distributor of Schaeffler product and services.

A Rich Bearing Lineage

Hi-Tech is part of the prestigious Premier Group which is India's No. 1 authorized industrial Bearing distributor for Schaeffler. For over four decades our group has been rolling in a future of performance.

Expansive Portfolio

As an authorised distributor of Schaeffler products, we have a vast portfolio of over 40,000 bearing products. Hi-Tech has been helping businesses accelerate and overcome challenges with 'out-of-the-box' bearing solutions. Through insights, precision and innovation for tomorrow, our group is creating excellence and ensuring customer satisfaction, availability and reliability.

A Powerful Solutions Network

The Hi-Tech team of experienced professionals have an expansive presence across Karnataka and can meet any challenge and come up with ingenious solutions wherever you are. We are on track to build a strong pan-India presence and deliver high-precision solutions across industries to ensure just-in-time requirement and easy availability of stock.

Expertise Across Industries

Hi-Tech is leveraging its extensive industry knowledge and expertise to deliver customised bearing solutions for industries and businesses. We serve large industries including automotive, engineering, mining and many more with a wholesome array of bearings and associated products such as bearing housing, mounting and dismounting tools, maintenance products, monitoring equipment and grease and oil seals.

A Team That Delivers Knowledge

At Hi-Tech our highly knowledgeable and industry focused team is driven to meet and exceed your highest expectations. This is a top-down approach imbibed in us by the astute leadership of our CEO, Mr. Bimal Kumar Bararia. His vast, hands-on experience of over 3 decades in the bearing industry, he has been instrumental in achieving an ever positive approach towards customer satisfaction.

Hi-Tech Success Factors

Competent sales team with technical background, which allows us to serve customers, answer preliminary technical queries or complaints

Partnership approach with ease of doing business

Widest range of bearing Inventory and 'Just-in-time' deliveries

Scalable and tailor-made services for all industrial applications

Mapping customer requirements for preventive & pro-active maintenance

Offering the entire Schaeffler portfolio of solutions seamlessly to customers –LuK, INA & FAG

“Our ‘Of course, We Can’ attitude is what defines team Hi-Tech; making us easy to work and partner with.”

Mr. B.K. Bararia

A large-scale industrial construction site under a clear blue sky. In the foreground, a massive, circular, metallic component, possibly a bearing or a large wheel, is being hoisted by a crane. The component is heavily coated in mud and has a complex internal structure. In the background, a complex network of steel beams and scaffolding forms a large industrial structure. A crane with multiple cables is positioned to lift the large component. The ground is a mix of dirt and concrete, with some tracks visible. The overall scene conveys a sense of heavy industrial work and engineering.

Applications Designed for Extreme Conditions

Having a diverse portfolio of Bearings solutions means the ability to meet unique requirements of targeted industries.

Schaeffler Industry Solutions

Metal Production and Processing

Pulp & Paper

Cement

Machine Tools

Textile Machinery

Electric Motors

Printing Machinery

Industrial Transmission

Fluid: Hydraulic pumps

Construction Machinery

Pneumatic

Agriculture

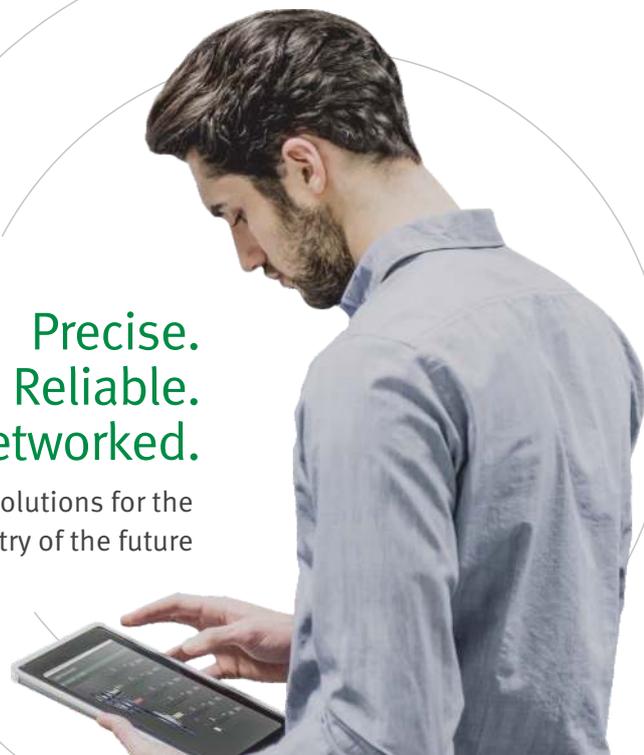

Hi-Tech is leveraging Schaeffler's vast Bearing portfolio and our own extensive industry knowledge & expertise to deliver customised bearing solutions for industries. The Schaeffler range includes everything from miniature bearings only a few millimetres wide through to large-size bearings with an outside diameter of several meters.

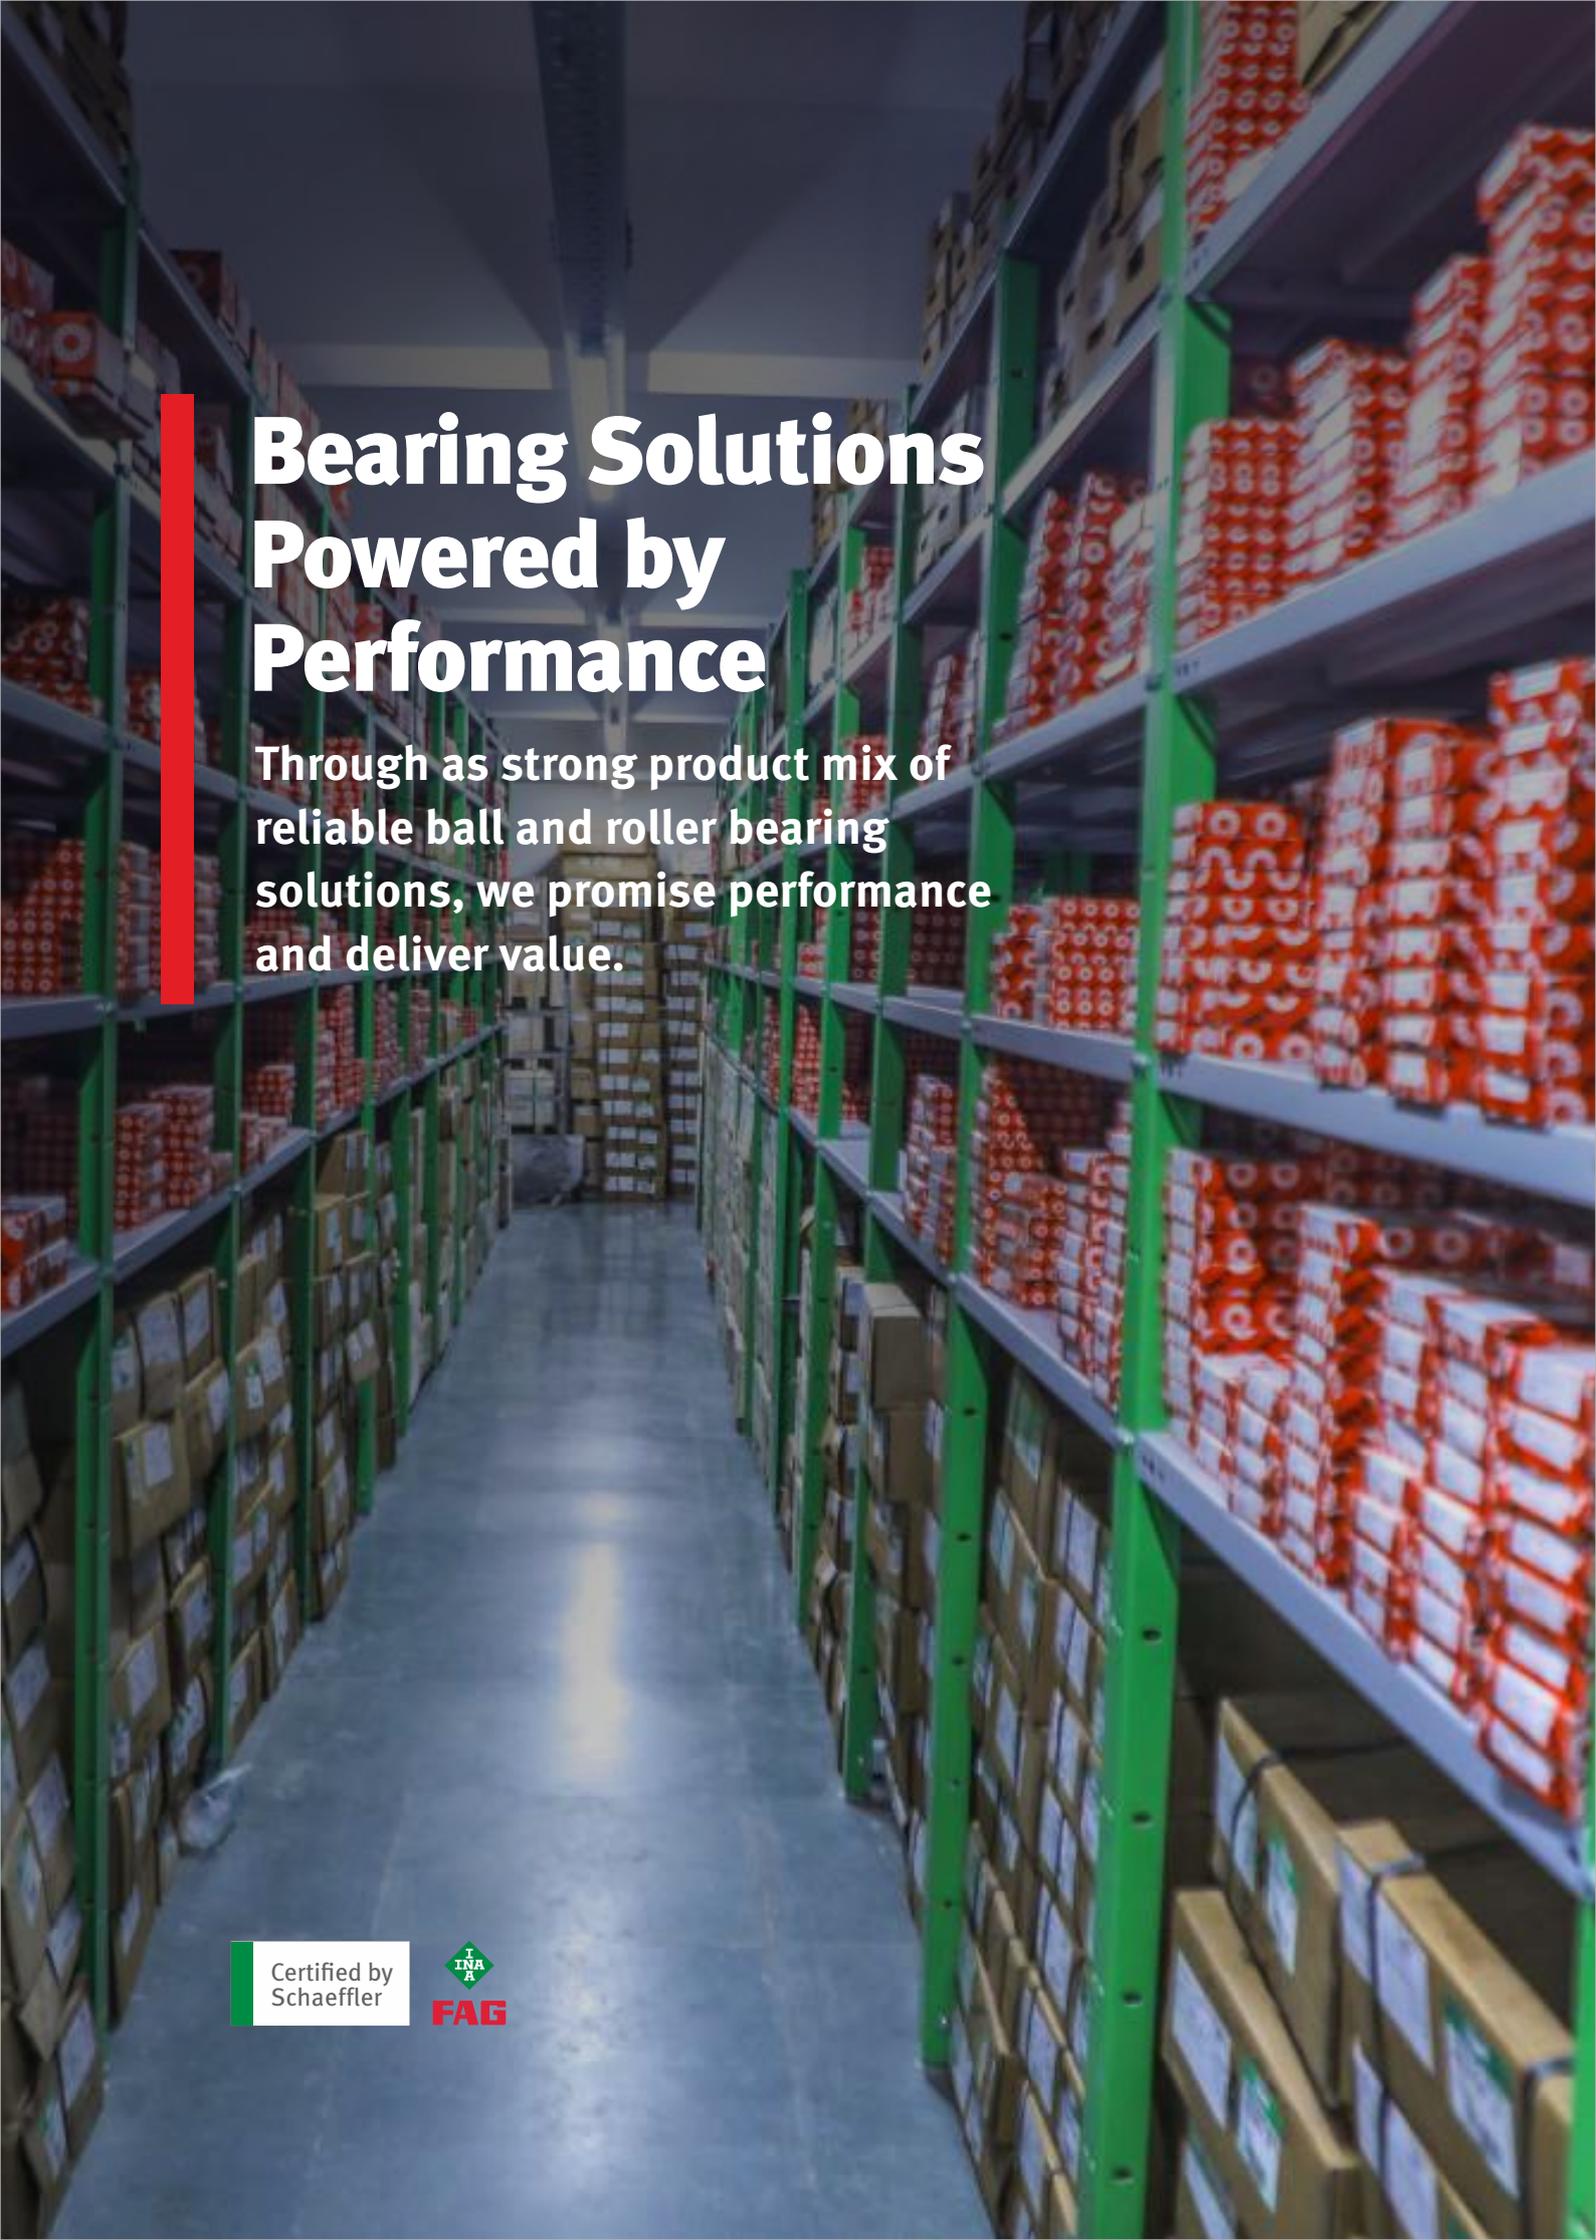

Schaeffler supplies around 60 different industrial sectors with rolling bearings and plain bearings, linear and direct drive technology, and a service portfolio including maintenance products, monitoring systems and other solutions.

We at Hi-Tech are making a decisive contribution to the reliability and quality of industrial operations.

Precise.
Reliable.
Networked.

Solutions for the
industry of the future

Bearing Solutions Powered by Performance

Through as strong product mix of reliable ball and roller bearing solutions, we promise performance and deliver value.

Certified by
Schaeffler

As an authorised distributor of Schaeffler products, we offer the widest range of bearings that will create excellence and ensure customer satisfaction, availability and reliability. And we are on track to build a strong pan-India presence.

Our state-of-the-art inventory system, latest communication facilities and online capabilities enable us to deliver high-precision solutions across industries to ensure just-in-time requirement and easy availability of stock. We pride ourselves in going above and beyond, to deliver the highest quality service to customers.

The Industrial division offers a wide portfolio of bearing solutions, ranging from high-speed and high-precision bearings with small diameters to large-size bearings several meters wide.

Maintenance services

Mechatronics

Digital services

On time deliveries, Every time

Inventory with widest range of industrial bearings
with on-board logistic partners

Delivering Service That Makes You Future Ready

Our experienced team goes beyond delivering product to delivering technology solutions. So that you don't just keep pace with change, you accelerate ahead of competition.

A world constantly evolving needs evolutionary technology solutions. That is where our transformative service solutions come into play. Today we are preferred partners for our clients because we provide innovative solutions and services that cover all phases in the lifecycle of bearings.

We also conduct training programmes at client premises to ensure that they can maximise the bearing usage, while minimising the cost of bearing maintenance.

Condition Monitoring

The malfunction-free and optimized operation of complex machinery and plants can only be achieved by means of condition-based maintenance. That means damaged components can be replaced as part of planned downtime, thus unscheduled downtime is avoided.

Mounting and dismounting

Our service experts offer mounting services for rolling bearings that are applicable across industrial sectors. They have detailed knowledge and extensive experience in all industrial sectors.

Rolling bearing reconditioning

During maintenance work, many bearings are replaced even though they have not yet reached the limits of their performance capacity. Reconditioning of rolling bearings may represent an economically attractive alternative here.

Other maintenance services

Hi-tech offers high-quality services in the areas of balancing and aligning, lubricating and technical consultation.
